# 23. Mine Diver Level I

### 23.1 Introduction

This course is the first stage in the TDI Mine Diver development program and is an introduction to the basic principles of mine diving utilizing a single primary guide line. This introduction is not intended to train divers for all facets of mine diving. The objective of this course is the perfection of skills taught in the TDI Cavern Diving program, in addition to the adoption of additional techniques and procedures required for elementary mine dives. This course may be combined with TDI Mine Diver Level II at the discretion of the instructor.

This course uses the same principles and techniques as the TDI Intro to Cave course, including utilizing the same training materials and equipment. However, dual certification is not permitted and graduates wishing to dive in caves must complete the TDI Intro to Cave course.

### 23.2 Qualifications of Graduates

Upon successful completion of this course, graduates may engage in single guideline Mine diving activities without direct supervision, provided the graduates adhere to the following limits:

- 1. Penetration is limited to 1/3 of a single diving cylinder, or 1/6th if using double cylinders
- 2. 40 metres / 130 feet maximum depth
- 3. No decompression diving
- 4. Maintain a continuous guideline
- 5. Proper mine diving equipment is used
- 6. Upon successful completion of this course, graduates are qualified to enroll in:
  - a. TDI Mine Diver Level II course

# 23.3 Who May Teach

Any active TDI Mine Diving Instructor specifically authorized by the HQ Training Department. Minimum criteria to be considered for authorization are: TDI Full Cave Instructor with a verifiable minimum of 30 mine dives

## 23.4 Student to Instructor Ratio

#### Academic

1. Unlimited, so long as adequate facility, supplies and time are provided to ensure comprehensive and complete training of subject matter

#### **Confined Water (swimming pool-like conditions)**

1. N/A

#### **Mine Dives**

- 1. A maximum of 3 students per active TDI Instructor are allowed
- 2. The ratio should be reduced as required due to environmental or operational constraints

Date: 01/01/2016 Version: 16.0

## 23.5 Student Prerequisites

- 1. Minimum age 18
- 2. Certified TDI Cavern Diver or equivalent

### 23.6 Course Structure and Duration

#### **Water Execution**

- 1. Minimum of 4 single guideline mine dives with a total bottom time of 100 minutes conducted at 2 different sites (different water entry points in the same mine system may be considered a different site for Mine Diver Level I training if they are at least 50 metres / 165 feet apart)
- 2. If the student is already certified as a TDI Intro to Cave or Full Cave Diver, a maximum of 2 dives may be credited towards Mine Diver Level I training at the discretion of the instructor
- 3. If combined with Mine Diver Level II, a total of 12 dives with a total minimum bottom time of 340 minutes must be conducted over a minimum of 6 days.

#### **Course Structure**

 TDI allows instructors to structure courses according to the number of students participating and their skill level

#### **Duration**

- 1. The minimum number of classroom and briefing hours is 4
- 2. Course must be taught over 2 days

## 23.7 Administrative Requirements

#### The following is the administrative tasks:

- 1. Collect the course fees from all the students
- 2. Ensure that the students have the required equipment
- 3. Communicate the training schedule to the students
- 4. Have the students complete the:
  - a. TDI Liability Release and Express Assumption of Risk Form
  - b. TDI Medical Statement Form

#### **Upon successful completion of the course the instructor must:**

1. Issue the appropriate TDI certification by submitting the TDI Diver Registration Form to TDI Headquarters or registering the students online through member's area of the TDI website

# 23.8 Training Material

### Required Material

- 1. TDI Diving in Overhead Environments Manual
- 2. TDI Diving in Overhead Environments Instructor Guide
- 3. TDI Diving in Overhead Environments Instructor Resource CD (Optional)

Date: 01/01/2016 Version: 16.0

#### **Optional Material**

- 1. NACD Art of Safe Cave Diving
- 2. Basic Cave Diving A Blueprint for Survival
- 3. CDAA Cavern / Sinkhole Manual
- 4. NSS-CDS Cave Diving Manual
- 5. The Darkness Beckons Martyn Farr
- 6. Cavern Measureless to Man

## 23.9 Required Equipment

### The following equipment is required for each student:

- 1. Primary cylinder(s); volume appropriate for planned dive and student gas consumption
- 2. Dual-orifice (Y) or (H) closed valve or dual valve manifold
- 3. Two independent first and second stage regulators; one regulator equipped with a long hose at a recommended minimum length of 2 metres / 7 feet
- 4. Submersible pressure gauge
- 5. Buoyancy compensator device (BCD) with power inflator
- 6. Exposure suit adequate for diving environment
- 7. Mask and fins, NO snorkel
- 8. Line cutting device
- 9. Three battery powered lights; 1 primary and 2 back-ups, each with a with burn time suitable for the planned dive time
- 10. Safety reel with a minimum of 37 metres / 125 feet of guideline
- 11. One primary cave-diving reel with length appropriate for intended dive
- 12. Computer, watch or bottom timer and depth gauge
- 13. Slate or wet notes with a pencil
- 14. Submersible dive tables or backup dive computer
- 15. Three directional line arrows

Required equipment is the same as TDI Intro to Cave diver. Instructor must use equipment required for TDI Full Cave diving during all water exercises

# 23.10 Required Subject Areas

#### The following topics must be covered during this course:

- 1. Policy for Mine/Cave Diving
- 2. Gas Matching Procedures and Management to Include Dissimilar Volumes
- 3. Psychological Considerations
- 4. Equipment Considerations
  - a. Cylinder options
  - b. Regulator options
  - c. Buoyancy compensator device (BCD) / harness options

# TDI Instructor Manual Diver Standards

Date: 01/01/2016 Version: 16.0

- d. Reel options
- e. Proper weighting
- f. Equipment configurations
- 5. Communication
  - a. Hand signals
  - b. Light signals
  - c. Touch contact signals
- 6. Swimming Techniques
  - a. Body posture/ trim
  - b. Buoyancy control
  - c. Line following
  - d. Propulsion techniques
- 7. Physiology
  - a. Breathing techniques
  - b. Stress management
- 8. Mine Environment
  - a. Types of mines
  - b. Geology
    - i. Bottom
    - ii. Ceiling
  - c. Structure
  - d. Hazards
  - e. Local access requirements
  - f. Land owner relations
- 9. Conservation
- 10. Problem Solving
  - a. Emergency procedures
  - b. Equipment failure
  - c. Silting conditions
- 11. Accident Analysis
- 12. Review of Dive Tables and Decompression Theory
- 13. Mine /Cave Diving Etiquette

# 23.11 Required Skill Performance and Graduation Requirements

As much of the following information as possible must be determined/obtained and utilized in dive planning:

- 1. What material(s) were extracted from the mine and by what method(s)
- 2. Were toxic solutions or substances used or created during the extraction process and is there a risk of such substance(s) remaining or of any general pollution. If so, ascertain which location(s)
- 3. Obtain a detailed map of the mine from the mining company or whoever is responsible for the site

# TDI Instructor Manual Diver Standards

Date: 01/01/2016 Version: 16.0

- 4. Are there any known or potentially collapsible tunnels?
- 5. All known access and egress points from the mine, their depths and possible emergency traverses to other exits
- 6. Type(s) of sediment in the mine
- 7. Type of ceiling supports; ie wooden or metal and how to detect signs of wear, type of debris left in the mine
- 8. All possible entanglement points
- 9. Location, size and depth of vertical extraction shafts
- 10. Points that could damage divers' delicate equipment such as lines, dry suits, etc
- 11. Line options
- 12. How to evaluate the stability of a passage
- 13. Existing collapse points
- 14. Special equipment requirements
- 15. Type of entry/exit

#### **Land Drills**

- 1. How to properly:
  - a. Deploy a guideline
  - b. follow a guideline
- 2. Use of safety reel in:
  - a. Lost diver procedures
  - b. Lost line drill

## The student must perform the following S-drill and skills during all dives:

- 1. Demonstrate:
  - a. Adequate pre-dive planning
  - b. Equipment check and equipment matching
  - c. Bubble check
  - d. Specialized propulsion techniques in varying types of flow
  - e. Proper buoyancy control
  - f. Proper body posture
  - g. Proper stress analysis (detection and management)

#### In-water skills

- 1. Properly deploy a guideline
- 2. Properly use line markers
- 3. Properly follow a guideline with eyes open and closed, simulating loss of visibility
- 4. Air share with a buddy with eyes open, following the guideline
- 5. Air share with a buddy with lights off, eyes closed and use touch contact, following the guideline
- 6. Remove and replace mask while in contact with guideline
- 7. Demonstrate light / hand -signals and touch contact
- 8. Conservation and awareness techniques

# TDI Instructor Manual Diver Standards

Date: 01/01/2016 Version: 16.0

- 9. Referencing as back-up navigation
- 10. Demonstrate adequate anti-silting techniques
- 11. Simulate a primary light failure, and use back light to exit the mine
- 12. Demonstrate lost line and lost diver drills
- 13. Identify and avoid potential hazard, entanglement and collapse points

#### In order to complete this course, students must:

- 1. Satisfactorily complete the TDI Intro Cave Diver Course written examination (this requirement may be waived by the instructor if the student is already TDI Intro to Cave certified)
- 2. Perform all land drills and mine dive requirements safely and efficiently
- 3. Demonstrate mature, sound judgment concerning dive planning and execution
- 4. Maintain an appropriate level of awareness and respect for the mine environment
- 5. Log all dives

## 23.12 Permission to Dive

Before conducting training in any man-made environment, permission must be obtained from whoever is responsible for the site; for example the mine owner/operator, government department, etc. Additionally, the relevant local emergency services should be informed of the activity prior to commencement.
